## Miscellaneous

---

Issued June '86  
Sheet 8/01

### **Reproduction Material and Mechanical Artwork**

All artwork and copy to be  
reproduced or enlarged ONLY  
photomechanically.

### **General Notes**

---

This section covers various items that are not readily defined within the other categories in this manual.

The logo, wherever used, is to conform to the standards as shown on sheets 1/10 to 1/12.

Requests for variations to guidelines that are included in this manual should be referred to the Manager, Graphic Services Department.

Issued June '86  
Sheet 8/10

### Reproduction Material and Mechanical Artwork

All artwork and copy to be  
reproduced or enlarged ONLY  
photomechanically.

### R.A.C.E. Containers

---

There are two basic type R.A.C.E. containers in use within V/Line — one which is a solid sided container and the other with canvas sides. An identification plate is situated either at each end of the container or, in some instances, along the metal side. These plates vary in length from 1050mm to 1220 mm whilst the depth is constant at 680mm.

The V/Line logo in Corporate colours, as shown in the following diagram, covers this identification plate.
